Experience the breadth of the photography spectrum with this pair of workshops. Learn to make and use the early, simplest Pinhole Camera in week 1, and use Digital Cameras in a lighting studio setting in week 2. (If you don't have access to a digital camera, we have a few to share for class.) Participants will make their own pinhole cameras and take photographs, then use the darkroom to make prints. Digital camera instruction represents the other end of the photography spectrum and will be explored in the controlled environment of the lighting studio on the second day of this two-day workshop. There will be time for reflection and critique of work produced, technically, formally and conceptually.
